Using Marp in GitHub Pages

Email: 23f1000504@ds.study.iitm.ac.in

Why Marp?

- Write presentations in **Markdown**
- Version control friendly (Git + GitHub)
- Export to **HTML, PDF, PPTX**
- Use **custom themes & directives**

Custom Theme Example

This slide uses a **custom theme** with Solarized colors 🎨

Slide with Background Image

Text appears on top of the background image.

(Place `background.jpg` inside `images/` folder in your repo)

Mathematical Example

Algorithm complexity for Merge Sort:

$$T(n) = 2T\left(\frac{n}{2}\right) + O(n)$$

Simplifies to:

$$T(n) = O(n \log n)$$

Code Example

```
def greet():  
    print("Hello from Marp!")
```
